Product Description

The DCR4 from NICOR is a 4" recessed LED downlight with plastic housing and trim that is ideal for both retrofit and new construction. Redesigned to boost energy efficiency, the enriched 90+ CRI provides superior color quality, along with an R9 greater than 50. Not only is the light quality better, but this design improvement meets industry standards, including Title 24 and CEC.

Construction

- Polymer trims prevent dents and scratches
- Low profile, integrated driver, allows for use in shallow housings

Optical System

 Polystyrene diffuser creates uniform light distribution that reduces glare without sacrificing lumen output

Electrical

- Utilizes high performing LEDs with greater than 90 CRI and an R9 greater than 50
- Dimmable to 10% with most standard TRIAC dimmers
- Operating temperature rating of 0°F to 102°F (-18°C to 40°C)
- Input voltage of 120V
- Lifetime rated for greater than 54,000 hours
- LM-79, LM-80 testing performed in accordance with IESNA standards
- Meets FCC Part 15, Subpart B, Class B standards for conducted and radiated emissions

Finish

- Matte white finish
- Available in smooth and baffle
- Available accessory trim covers in Black, Aged Copper and Nickel

Installation

- Compatible with most 4" recessed housings
- Quick and easy installation with an Ideal[™] connected screw-in Edison base (GU24 socket string available) and friction clip mounting system
- Warranty
- 5-year limited system warranty standard
- · Warranty does not cover product failure due to an overvoltage event (power surge)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received,

including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna.

—Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

* White Baffle finish option only available for 2K and 3K downlights.
